

Installation Guide

Follow these steps to successfully open and run the “Battle for Westeros” mobile app:

1. Install Android Studio <https://developer.android.com/studio/>
2. Download “Battle for Westeros” <https://github.com/ianfeekes/CMPS115> by clicking the “Clone or download” button and selecting the “Download ZIP” option.
3. Unzip the file in the directory/folder of your choosing.
4. Configure/open Android Studio.
5. Go to “File” > “Open” > select the BattleForWesteros folder.
6. Load in a new window or open in current window.
7. Create a virtual device or plug in your own Android device (make sure USB debugging is toggled in the Settings > Developer options).
8. Press the green play button in the toolbar above to run the app.
9. If the app does not run, press the green hammer button (Make Project) in the toolbar and try running again.

User Manual

Navigation:

- When the application is opened, you will be greeted with a main menu that has three buttons: “FIGHT MENU”, “SELECT LOADOUT”, and “EXIT”.
 - Press FIGHT MENU to open the dungeon selection.
 - Press SELECT LOADOUT to open the inventory menu.
 - Press EXIT to exit the application.

Equipping items:

- To equip weapons and armor before initializing combat, press SELECT LOADOUT.
 - Select the weapon and armor you want to use.
 - Once selected, a system message to appear at the bottom of the screen to confirm your selections.
 - Press the Back button on your device to return to the main menu.

Engaging in combat:

- To initialize combat, press FIGHT MENU.
 - Select the dungeon you want to start in.
 - If you want to return to the main menu before fighting, press the house icon.

- In the combat state, blue tiles denote spaces you can traverse, yellow tiles denote spaces enemies are located on, and red tiles denote spaces you are unable to traverse.
